Conserving our Energies: A Process Theorization on How to Stabilize and Conserve Paper Works Created by Bjorn Wiinblad

Kevin Gibson, who was a Fall 2023 intern from the University of Texas at Tyler, wrote a research paper discussing the methods of art conservation. Investigating art restoration procedures for works on paper, he defined the field of conservation. Then, he examined four artworks that are in his personal collection. He provided a biography of the artist Bjorn Wiinblad and explained his art methods. This research paper serves as a thesis of how the lithographs could be conserved if conservation processes were applied to the pieces.
